## NOW IN COMPACT WEATHERPROOF BAGS

At Fosroc we've improved the bags used for our powder products in an industry first packaging solution.

Our new compact bags are available for

- **Renderoc<sup>®</sup>**
- **Conbextra<sup>®</sup>**
- **Cemtop<sup>®</sup>**
- **Guncrete**
- **Patchroc<sup>®</sup>**
- **Paveroc**
- **Nitoflor<sup>®</sup>**

### UV RESISTANT

The new low-density polyethylene (LDPE) bags are resistant to damaging UV rays, helping maintain product integrity.

### SUITABLE FOR OUTDOOR STORAGE FOR UP TO 12 MONTHS

The new bags are rainproof to better protect the product from rain and moisture.

### MORE COMPACT BAGS

The bags are more tightly filled which improves product stacking while also ensuring they are easier to pick up, carry and use on site.

## Fosroc Nitomortar EL-HB

Nitomortar EL-HB is a three component, solvent free system consisting of epoxy resins and a special blend of chemical resistant fillers. It has a thixotropic consistency for easy hand placement, prior to finishing the surface of the application with a trowel. It is simple and cost effective for overhead, vertical and horizontal patching from 5mm to 50mm on both dry and damp surfaces. It can be used in brick, block and precast concrete manholes.

## PRIMERS AND BONDING AGENTS

### Fosroc Nitobond EP

Nitobond EP is a two component epoxy bonding agent for bonding fresh wet cementitious materials to existing cementitious surfaces. It is suited to internal and external applications. It can also be used as part of a repair system where a substrate/repair barrier is required or where the substrate is likely to remain permanently damp or wet.

# CORROSION CONTROL SYSTEM

## VECTOR® Galvashield XP

Galvashield XP range of embedded galvanic anode units utilise an innovative zinc anode core design surrounded by an enhanced formulated cement-based mortar to provide corrosion mitigation to reinforced concrete structures. Once installed, the zinc anode corrodes preferentially to the adjacent reinforcing steel, thereby providing galvanic corrosion prevention or corrosion control.

## VECTOR® Galvanode DAS

Galvanode DAS Marine is a distributed anode system designed to provide corrosion control or cathodic protection to concrete structures in marine environments. Galvanode DAS Marine anode units are alkali-activated and not dependent on direct exposure to salt water. This allows the anode units to provide excellent protection to concrete elements exposed to a range of conditions (submerged, splash zone, periodic spray and atmospheric).

WATERPROOFING

## CEMENTITIOUS WATERPROOFING

### Vandex BB75-Z

Vandex BB75-Z is a surface applied, cement based render, waterproofing barrier for positive and negative water pressure applications. It can be used on most masonry surfaces, including sandstone, provided surfaces are adequately prepared. Ideal for applications solving when the pressure face is not easily accessible.

**Typical applications:** Waterproofing the inside face of swimming pools, sewerage processing tanks, concrete block walls and many other masonry surfaces.

PRODUCT CODE	DESCRIPTION	SIZE	QTY PER PALLET	BARCODE
 FC051005-25KG	VANDEX BB75-Z 25KG	25KG	40	 7612940000625

## Vandex Elasticizer PK75

Vandex Elasticiser PK75 is mixed with Vandex BB75-Z to form Vandex BB75E-Z a crack accommodating cement based render, waterproofing barrier for waterproofing of concrete and masonry structures, either positive or negative side, where live cracks up to 0.5mm are present.

**Typical applications:** Ideal for solving the problem of water seepage through concrete and masonry where live cracks are present in both new and old structures.

PRODUCT CODE	DESCRIPTION	SIZE	QTY PER PALLET	BARCODE
 FC051003-10KG	VANDEX ELASTICIZER PK75	10KG	60	 7612940000069

## Vandex Cemelast

Vandex Cemelast is mixed with Vandex BB75-Z to form a flexible, surface applied, cement based render for waterproofing of concrete and masonry structures, either positive or negative side, where live cracks up to 0.3mm are present.

**Typical applications:** Ideal for solving the problem of water seepage through concrete and masonry where live cracks are present in both new and old structures.

## Fosroc Supercast PVC Waterstops

Supercast PVC waterstops are designed to provide an integral sealing system for movement and construction joints in cast or concrete. The range consists of centrally placed profiles; Supercast Hydrofoil and Rearguard externally placed profiles. Supercast PVC waterstops are available as straight lengths (rolls) and factory produced intersections.

**Typical applications:** Expansion and Construction joints in water retaining and water excluding structures such as tanks and basements.
