# Linley Valley Pork

WA

**CUSTOMER** Linley Valley Pork  
**CONTRACTOR** PM Industries  
**SECTOR** Food And Beverage  
**DATE** 2023

## PRODUCTS

- Fosroc Nitoflor PU600
- Fosroc Nitoflor PU200
- Fosroc Nitomortar 903
- Fosroc Nitobond EP
- Fosroc Nitoseal SC600

**Proven performance sees Fosroc ANZ's Nitoflor PU600-200 polyurethane cement solution specified again at Linley Valley Pork.**

## THE PROJECT

Thriving in its market, Linley Valley Pork is the largest fresh pork supplier in Western Australia servicing the retail, food service and export markets.

Fosroc ANZ provided a solution in 2017 for the company through sealing a new cool room, marshalling area and loading dock. The floor needed to be hard wearing, resilient, anti-microbial and aesthetically pleasing. This project's challenges included different expected temperatures for the cool room and various gradients on the floor due to the drainage waste strip.

Linley Valley was so happy with the 2017 results that Fosroc assisted the company again in 2023 by supplying Nitoflor PU600-200 as a solution for its new freezer room floors.

## THE SOLUTION

Linley Valley Pork required safe, resilient, slip-resistant flooring for two new freezer rooms taking up 1000 square metres.

Fosroc ANZ again recommended the Nitoflor PU600-200 system as the ideal solution.

Linley Valley had seen first hand that this heavy-duty system can handle extreme temperatures and conditions, as well as provide the essential slip resistance required to keep staff safe on site.

The company applied 1000 m2 of Nitoflor PU600 before finishing with the Nitoflor PU200 top coat to comply with Linley Valley Pork's health and safety requirements.

The entire project took only a few days, including preparation, application of the base PU600 coat, the anti-slip aggregate and the PU200 topcoat.

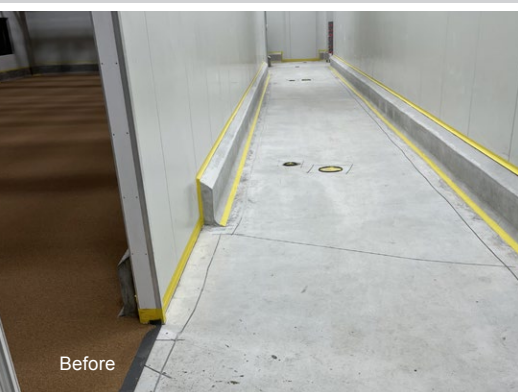

## THE BENEFITS

Fosroc ANZ's Nitoflor PU600-200 system is hard wearing, resilient, and anti-microbial. Importantly, the system is HACCP certified, meaning it is approved for use in food and beverage facilities. It meets consumer food safety standards, is non-toxic and easy to clean.

Additional Nitoflor PU600-200 system benefits include:

- Handles extreme temperatures
- High chemical resistance
- Hard wearing – abrasion resistant
- Low odour and non-tainting during application
- Fast turnaround times (foot traffic after 24 hours, vehicle traffic after 48 hours)
- Excellent slip resistance properties with aggregates broadcast

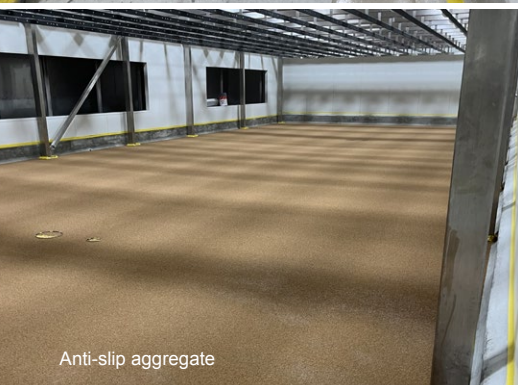

Thanks to Nitoflor PU600-200, Linley Valley Pork's new freezer room floors are providing the safe, hygienic, hard-wearing and easy-to-clean surface this busy abattoir requires.
